Accessories

CEG offers a full range of accessories to compliment the AIR-SPADE®.

Angle Adapter. Turns nozzle 45° to barrel. Allows operator to dig underneath objects. Positions nozzle perpendicular to ground with tool held at comfortable angle.

Interchangeable Nozzles. 15, 25, 60, 105, 150, and 225 scfm at 90 psig. Nozzles all dig same types of soil, but work faster or slower roughly in proportion to amount of air used. Match different air compressors (see reverse.)

Light-weight air hoses. Standard 10, 25 and 50 foot lengths. Stores easily. Use between AIR-SPADE® and standard compressor hose to reduce operator fatigue.

Parts Kit. Set of spare parts including foam grips, springs, washers, gauge, valve stem, screws, plug, and trigger cover.

Storage Case. Rugged, air-tight, foam-lined case with handles, wheels, snap closures, and lock.

Extensions and Reducers. 2, 3, 4 and 5 foot standard. Custom lengths to 8 feet.

High Pressure Regulator. Use to run AIR-SPADE® with 15 to 60 scfm nozzles off of 4500 to 6000 psi air bottles.

Faceshield. Secondary protector must be worn with primary eye protection.
